

Making Life  
Healthy™

## The Pharmaceutical industry

Pharmaceuticals have a long history that dates back thousands of years to early societies. These ancient societies treated a variety of illnesses using natural remedies such as plants, herbs, and minerals.

Since then, industry has changed. Many novel medications were discovered in the 19th century as a result of the growth of organic chemistry. These medications were frequently made from natural sources but were refined and created in a lab to boost their strength and efficiency.

The development of pharmaceutical products surged in the 20th century, which resulted in the identification of several new pharmacological classes, including antibiotics, hormones, and chemotherapeutic agents. These medications have significantly impacted human health, saving countless lives and raising the standard of living for many.

The pharmaceutical industry is a multi-billion dollar worldwide business that employs millions of people and creates a wide variety of pharmaceuticals to treat a wide range of illnesses and disorders. The sector does, however, also confront a number of difficulties, including escalating costs, heightened regulations, and reservations over the efficacy and safety of some medications.

“ We are committed to Innovation, Quality, and Services which keep us motivated. ”

Aneta Pharmaceuticals Pvt. Ltd. is a fully integrated Pharmaceutical company that develops, manufactures and markets a variety of high-quality formulations to meet market demands.

Our capacity to scale up and commercialise, together with our expertise in product development, drug delivery system development, and collaborative working partnerships, can assist streamline the challenging process of bringing innovations to market rapidly. We are assured to offer superior formulations because to our solid technological foundation, world class infrastructure and resources.

Aneta philosophy where the primary focus is on the patients' **Making life healthy**. Specialisation at Aneta, we believe in prevention then cure hence our key focused product range of Oral Formulations mainly Tablets and Capsules, which includes the Therapeutic Areas of

- Lipid Lowering
- Cardiovascular
- Anti-Diabetic
- Pain & Fever Management
- Hematinic + Multi Vitamins + Nutrition
- Gastro Anti-Ulcerant
- Anti-Infective
- Anti-Fungal
- Anti-Histamines Cold & Cough
- Neuropathy Pain Management
- Analgesics
- Antipyretics
- Anti-Inflammatory
- Immune and Endocrine systems

VISION

Is reaching people globally and touching their lives by providing high quality affordable medicines.

MISSION

Our mission is to serve humanity with quality medicines that makes life healthy and ensure a better tomorrow.

Core Values

Are Health first Trust, Integrity, Innovation, Quality, Collaboration, Respect & Transparency and focus on patients Social Responsibility as a Humility. Whatever we create involves lot of love and empathy.

Health First

The dedication to prioritising patients' needs and creating therapies that enhance their health results.

Integrity

A dedication to preserving high standards of corporate governance and conducting business in an ethical and transparent way.

Innovation

A commitment to investing on Research and Innovation to find novel cures and treatments that can make patients' lives longer and healthier.

Quality

The dedication to producing medicines to the greatest possible standards while guaranteeing their reliability, safety, and efficacy.

Collaboration

Our long-term vision includes growth through various business strategies and our management is focused with long term vision of growth through mergers and acquisitions with our global reach and presence we intend to expand and grow our business and take it to greater heights.

Social Responsibility

The dedication to conducting awareness program in a socially responsible manner, which includes backing programmes that advance public health and wellbeing and making sure that everyone who needs access to medications may do so at an affordable price.

These core principles provide the foundation for our decisions and activities, and they demonstrate their unwavering dedication to enhancing patients' quality of life and advancing medical science.

## Quality Standards / Quality Assurance Policy

We are dedicated to using quality as a competitive advantage in addition to complying with quality criteria.

Since we've started, we successfully conducted several inspections by various regulatory bodies of our finished dosage pharmaceutical factories, actively participated in multiple industry-wide task groups, and actively engaged in negotiations with authorities to alleviate medicine shortages. We are committed to upholding a strong and long-lasting basis for quality compliance and prioritising quality to encourage ongoing compliance. In order to offer dependable and high-quality goods, we work to ensure that quality is an integral part of our corporate culture and is represented in every aspect of our everyday operations.

## WHO-GMP CERTIFIED COMPANY

### Expertise

We are aware that being a trustworthy manufacturer of pharmaceutical which requires more than just high-quality products; it also requires trust, commitment and expertise.

Our team has pharmaceutical industry knowledge necessary to meet the unique needs of our customers.

#### Unparalleled Research & Development

Team is dedicated towards developing new products, improving existing products as well as drug delivery system and expanding product applications for their safety and efficacy.

#### Supply Chain Management

Organizing the logistics and distribution of medicines to make sure that patients get delivery on time.

#### Internationally Compliant Regulatory Affairs

Getting regulatory permission for new medications and making sure they are developed in compliance with all relevant laws. Our manufacturing plant, machinery and processes are compliant with the standards laid down by CFR – Code of Federal Regulation title 21 part 11

#### Commercialization & Marketing

Launching new medications and educating patients, healthcare professionals, and other stakeholders about them.

#### Strict Quality Control & Quality Assurance

We follow all the GLP and GMP Practices to deliver you the top-quality products that are equivalent to formulation from researched multinational companies. Our QC and QA departments equipped with the latest testing equipments and backed by qualified and experienced staff which ensure that our products are top quality.

#### Medical Affairs

Providing patients, healthcare professionals, and other stakeholders with scientific and medical assistance, especially through medical education and communication.

We are focused to expediting patient access to healthcare solutions and are constantly expanding our formulations facility's various dosage forms offering.

The primary goal of the F&D is to create new medicine formulations for current medications while keeping up with contemporary advancements in solid oral dosage forms.

In essence, our F&D capabilities are essential to delivering on our commitment to meet unmet patient requirements, make expensive medications more affordable, and improve patient disease management.

The formulation and development department are equipped with a pilot plant that includes Blister Packing Machines, Capsule Filling Machines, Tablet Compression Machines, FBD, Blenders, Shifters, RMG, Co-Mill, Tablet Coaters, as well as Friability Test Apparatus, Disintegration Test Apparatus, and IR Moisture Balance, among other things. These equipments are supported by stability chambers and a well-equipped Quality Control/Analytical Development Laboratory.

## Manufacturing Facilities

Aneta Pharmaceuticals Pvt. Ltd., Ahmedabad works to expand access to affordable healthcare across the nation, supported by a first-rate quality control laboratory and quality control tools. With the use of Standard Operating Procedures, Standard Test Specifications, Self-Inspection, Risk Assessment, and other shop floor activities, our primary quality assurance operations guarantee top-notch quality in its outputs. We have a modern F&D facility on site.

### Manufacturing Plant

The building also has a level for finished products storage and a store for raw and packaging materials, as well as a quality control laboratory with separate sections for a chemical lab, an instrument lab, and a microbiological lab.

Rapid Mixer Granulator

Stability Chambers 1000 Liters

## Utility Area

The facility's air handling system has various filtering stages that guard against even the smallest contaminations. The method for producing purified water also relies on a number of other techniques, including chlorination, carbon filtration, dichlorination, cartridge filtering, reverse osmosis, electro-dionization, and UV light.

Our procedures attempt to use water resources as efficiently as possible, and our effluent treatment facility guarantees that production-related waste and effluents are properly treated.

## Installed Capacity

Aneta has the tools necessary to produce tablets and capsules. For tablets and capsules, its estimated capacities under three shifts are as follows:

Tablet	Capacity in Millions (P/A)
60 kg Granulation line	281
250 kg Granulation line	3113

## We prioritise a growth strategy

We are healthcare growth strategy experts, unlike big consulting organisations that alternate between operational and diverse strategy work. Because of this, we have considerable expertise in investigating innovative business models, assessing emerging mechanism, breaking into new markets, and maximising unique policies. Our intent determines outcomes.

We put practicality and clarity first.

We take great satisfaction in highly innovative answers to challenging issues. We both have a love for using persuasive narrative, solid business arguments, and practical advice to assist our customers develop winning plans and earn the support of their organisations.

We support making decisions based on facts.

We support making decisions based on facts. Our consulting strategy is characterised by insight development and quantitative precision. We are professionals at creating research to support quantitative models, creating projections in cutting-edge and emerging markets, and quantifying the indescribably tough.

We provide top-notch customer service.

Above all things, we place a great importance on cooperation and partnership, and we plan our engagements to be very iterative. We get things going quickly, meet tight deadlines, and adapt quickly to changing customer demands. Our top executives maintain a high bar for quality throughout our engagements and are actively involved.

Pharmaceutical production, which includes the creation of tablets, capsules, and ointment/gels, is generally a difficult, tightly controlled process that necessitates close attention to detail and observance of exacting quality standards. At Aneta, we dedicate all of our attention to producing different medications.
